

Gold Digital Dinar (GDD)

Base Network Whitepaper

Network: Base

Smart Contract: 0x6C1d71D2f8c5C55A617940FfEcecf7262c439193

Liquidity Pool: 0x0a127af3a19d2e97a94fbf8428dc7d83d58cc684

1. Executive Overview

Gold Digital Dinar (GDD) is a digital asset operating on the Base Network. The project focuses on providing a transparent blockchain-based token ecosystem with publicly verifiable smart contract infrastructure and decentralized liquidity access. The current release centers on the contract address and liquidity pool referenced above, which serve as the primary points of reference for integrations, listings, and community interactions.

2. Token Snapshot

Token Name	Gold Digital Dinar
Ticker	GDD
Network	Base
Total Supply	700,000,000 GDD
Primary Contract	0x6C1d71D2f8c5C55A617940FfEcecf7262c439193
Primary Pool	0x0a127af3a19d2e97a94fbf8428dc7d83d58cc684
Security Model	Multisig-controlled administrative actions

3. Transparency and Public Infrastructure

The project emphasizes transparency through public blockchain infrastructure. All token transfers, liquidity activity, and interactions can be independently verified through Base network explorers. Consistency across websites, wallets, and listing platforms helps ensure that users can confirm they are interacting with the correct contract address.

4. Multisig Security Model

GDD adopts a multisig-oriented security model for sensitive administrative or treasury actions. Requiring multiple approvals for critical operations reduces single-key risk and aligns operational practices with common decentralized security standards.

5. Base Network Deployment

The project is documented around its deployment on the Base network. This affects wallet compatibility, explorer references, and liquidity routing. All official materials should reference the Base network contract address and the primary liquidity pool when identifying the project.

6. Token Supply and Distribution

Total Supply: 700,000,000 GDD

Allocation	Percentage	Amount (GDD)
Liquidity Pool	40%	280,000,000
Community Rewards	25%	175,000,000
Development Fund	20%	140,000,000
Marketing & Partnerships	10%	70,000,000
Team & Advisors	5%	35,000,000

7. Liquidity and Market Infrastructure

The liquidity pool published above provides a focal point for market access and price discovery. Market participants and listing platforms can reference the pool address to identify the primary trading pair associated with the Base network deployment.

8. Communications and Community Channels

Official project communications, announcements, and updates are distributed through the project's website and public social channels. Maintaining consistent references to the contract and network helps ensure clarity for users, integrators, and listing platforms.

Important Notice

This document is provided for informational purposes only and does not constitute financial, legal, or investment advice. Users should independently verify all contract addresses and on-chain data before interacting with the token.
